UI/UX	Styled Components

/ LEARNING

Python, Java, Android Studio,
React Native, ML, Math for
ML, Data Structures and
Algorithms, SQL, SQLite, PHP,
.NET, C#

/ SUMMARY

I am a web developer with 8 years of experience in JavaScript and responsive design. I write clean, efficient code and meet deadlines. I thrive in team environments, collaborating and building strong professional relationships. My goal is to join a well-established company to enhance my skills and contribute to its success.

With a track record of delivering high-quality web applications, I continuously seek to improve my expertise in modern web technologies. My ability to adapt to new challenges and stay current with industry trends has been instrumental in my career growth. I am passionate about creating user-friendly, accessible, and visually appealing websites that meet client needs and drive business objectives.

I love learning and never stop seeking new knowledge. Currently, I am deeply interested in Machine Learning, especially the mathematical concepts that underpin it. I'm eager to understand how these systems work at a fundamental level, and not just use pre-built programs. By mastering the mathematics behind Machine Learning, I hope to gain a deeper understanding of these technologies.

/ WORK EXPERIENCE

REACT DEVELOPER

CHAS || London || Sept 2023 – Now

CHAS

UK's leading provider of compliance and risk management solutions.

Tech Stack: React, Redux, TypeScript, MUI Components, HTML, CSS, monorepo.

Responsibilities:

- Developed and updated web pages using React and TypeScript along with MUI components, ensuring a modern and responsive user interface.
- Fixing bugs and maintaining sections of the websites, ensuring optimal performance and user experience.
- Working in an agile environment to manage tasks efficiently and deliver timely updates.
- Coordinating with backend developers to integrate and consume APIs, ensuring seamless frontend functionality.

Key Projects:

- Led the redesign and optimisation of a major website section, significantly enhancing user navigation and performance.

/WORK EXPERIENCE

REACT DEVELOPER

Recite Me || London || Jun 2022 – Sept 2023

RECITE ME

Provides accessibility and language options tools to every online user.

Tech Stack: React, TypeScript, Styled Components, MUI Components, HTML, CSS, Storybook, Yup, Emotion, Zustand, Redux.

Responsibilities:

- Led the creation of reusable React components, integral to a comprehensive design system implemented across the entire application.
- Managed and updated the Storybook project, effectively showcasing design system components for developers and designers.
- Developed new features from scratch, translating design specifications into functional and visually appealing web pages.
- Mentored junior developers, providing guidance and support to enhance their skills and adherence to best practices.

Key Projects:

- Successfully enhanced the design system, improving developer efficiency and consistency across the application.
- Played a crucial role in expanding the accessibility features, making the web application more inclusive and user-friendly.

REACT DEVELOPER

TOGGLE.AI || London || Jan 2021 – May 2022

TOGGLE.AI

An investing tool that uses AI to analyse stock market assets.

Tech Stack: React, TypeScript, Sass, Styled Components, HTML, CSS, Storybook, Zustand, React Testing Library, Jest, Next.js.

Responsibilities:

- Developed reusable React components essential for a cohesive design system implemented across the entire application.
- Managed and continuously updated the Storybook project, providing a comprehensive showcase for design system components and ensuring consistent documentation.
- Created and integrated tests for previously untested components using React Testing Library and Jest, significantly improving code reliability and coverage.
- Identified and resolved UI bugs related to dynamic source data changes, maintaining a seamless and responsive user experience.

Key Projects:

- Enhanced test coverage by developing and integrating unit and integration tests for all new and legacy components, improving overall code quality and stability.
- Collaborated on the development of a dynamic component library, ensuring reusability and consistency across multiple projects within the application.

/WORK EXPERIENCE

OPTIMISATION DEVELOPER

WeTeachCRO || London || Jan 2020 – Jan 2021

WeTeachCRO

Conversion Rate Optimization Agency.

Tech Stack: HTML, CSS, JavaScript, jQuery, Firebase, Local Storage, React.

Responsibilities:

- Developed and implemented new components on client websites using HTML, CSS, JavaScript, jQuery, and React to enhance user experience and drive conversions.
- Conducted A/B testing by injecting and modifying components on existing client websites, analyzing results to determine the most effective variations.
- Collaborated with design and marketing teams to ensure the seamless integration of new features and improvements aligned with client goals.

JUNIOR WEB DEVELOPER

Luxus Worldwide || London || May 2016 – Aug 2019

Luxus Worldwide

Digital Marketing Company

Tech Stack: HTML, CSS, JavaScript, CMSs.

Responsibilities:

- Designed and developed HTML emails to enhance customer engagement and marketing outreach.
- Developed and maintained responsive web pages utilizing HTML, CSS, JavaScript, and Adobe's Content Management System (CMS).

Key Project:

- Successfully led the creation of a new website for the travel technology company Amadeus, improving user experience and site performance through innovative design and development techniques.
